January 2022

Energy surcharge and price increase for Sublimation and Inkjet papers

Dear Business Partner

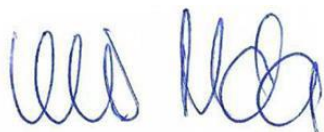

Ongoing cost inflation and rising input costs across all raw materials and services are continuing to deteriorate our margins. The levels and the frequency of those upward changes are unprecedented, unfortunately limiting forecast accuracy. Furthermore we expect energy costs to remain volatile on a very high level for the next months.

Sappi Europe can no longer absorb the full extent of those unprecedented cost inflation and will therefore adjust the actual surcharge by +100 Euro per ton. For deliveries ex-mill and ex-stock as of 1st of February the surcharge will be 200 Euro per ton.

The 200 Euro surcharge will be valid at least till end of March and from 1st April the surcharge will be incorporated into your sales price.

You will be contacted by the Sappi sales team to discuss the detailed implementation.

With kind regards

Luis Mata
